PRODUCT CATALOG 2022/2023

Valid from 1 July 2022

TRYGG is a recognized world leader in the field of chain production. Our TRYGG products are especially developed for users operating in extreme environments where reliability and safety is paramount.

TRYGG chain is the only remaining chain manufactured in Norway, and is widely recognized as a global leader within its scope of expertise. By using high quality steel produced in European steelworks, and maintaining full control throughout the entire production process, TRYGG chain guarantees quality in every link.

We pride ourselves on satisfying our customers supply chain requirements, and therefore maintain one of the largest “ready available” stocks in the business, both with regards to volume and product diversity. We also offer “Tailor made” solutions and are the supplier of choice to many reputable companies within the shipbuilding, seismic, and oil and gas industries.

TRYGG chain guaranteed against breakage!

TRYGG chains are guaranteed against breakage! For more than 80 years we have acquired solid expertise in material selection, forming, welding and hardening. The sum of these processes is key to Safe Quality. Steel from Western steel mills and full control of production and product development, guarantee the TRYGG product quality. In the unlikely event that you experience breakage despite proper use, your dealer will quickly replace or repair the chain in the best possible way. Choosing TRYGG is easy! See details on breakage guarantee on page 45.

Certified quality, environment and safety!

Nøsted & is certified according to ISO 9001, the standard for quality management, ISO 14001, the standard for environmental management and NS 5960:2010 based on ÖNORM V 5119, product certification for snow chains.

We are constantly working to minimise our environmental footprint. Through our ISO certified management system, we have ensured that the environment and sustainability is an important factor in all improvement decision-making processes, and are included in our strategic goals. We have a strong focus on energy efficiency, and use modern tools for energy management. In Norway our electric power consumption is based on 100% renewable hydro power. Nøsted & has developed the industry's most energy-friendly production.

7 things you need to know about **TRYGG** chains:

1

RECOGNIZED ALL OVER THE WORLD

Ice road truckers have one thing in common. They use TRYGG from Nøsted &.

2

PRODUCED IN NORWAY

TRYGG chain is produced for Norwegian conditions at Norway's only chain factory. Our chain is the only one on the market that is certified according to NS 5960: 2010 based on ÖNORM V 5119.

3

THE TOUGHEST CHAINS

TRYGG heat treatment more than doubles the breaking resistance you would expect from tire chains. TRYGG chain is made of double boron steel, with double hardening and double resistance to breakage.

4

MOST CROSS LINKS

Always two cross links in the ground. Our tight chain has significantly more cross links than semi-tight chains from our competitors. This provides the best grip, the best comfort and the greatest value for money.

5

TAILORS

Tractor chains from TRYGG are the market's most flexible chains. They can be easily shortened and lengthened as new and old tires require it. Each chain fits a number of different tire dimensions.

6

LEADER OF INNOVATION

Nøsted & is committed to continuous improvement and has invested in new, state-of-the-art test center and laboratory. Nøsted & has led the product development and we will continue to do so.

7

STOCK AND DELIVERY CAPACITY

Nøsted & has a full warehouse. We dispatch quickly and efficiently.

TRUCK

TRYGG tire chains are available for all types of applications. From light chains with high comfort via conventional studded chains with square links to floating diamond-patterned chains for heavy machinery and difficult conditions.

COMPARISON OF PROPERTIES FOR TRYGG TRUCK CHAINS

	SUPER	SUPER TIGHT	SCAN TRAC	GRIZZLY	SUPER SNAKE	BOSS
Road	****	*****	*****	****	****	****
Terrain	***	****	**	*****	***	****
Grip, steering	**	****	****	****	*****	****
Grip, ice	***	****	****	*****	****	*****
Weight (light)	*****	****	*****	**	****	**

Grip on ice depends on the weight of the vehicle. Too much chain compared to weight lowers the grip.

SUPER STANDARD

TRYGG Super series is our most popular transport chain. It is made from a superior steel quality which is used in all parts of the chain. The technology allows us to reduce the weight while maintaining the renowned TRYGG quality. The chain has 8 mm hardened hooks, 6 mm hardened side chain and 7 mm specially hardened cross chains with 7x9 mm square studs. It weighs 25% less than the original design. Cam rails are optional.

DETAILS

The square studs offer a number of advantages such as a larger hardening surface, sharp edges also on worn studs. 8 mm hardened hook, grade 8 side chain strength and 7 mm case hardened cross links added i.a. boron, manganese and nickel for optimal durability and toughness at the same time.

SUPER TIGHT

TRUCK DRIVER'S FAVORITE!

The same as TRYGG Super, although with more cross chains than regular version! That gives improved grip. It is made of superior quality steel, which is used in all parts of the chain. Our technology allows us to reduce the weight maintaining the renowned TRYGG quality. Oversized studs provide up to 25% larger wear surface than regular snow chains. Cam rails are optional.

DETAILS

The square studs offer a number of advantages such as a larger hardening surface, sharp edges also on worn spikes and thus better grip. 8 mm hardened hook, grade 8 strength side chain and 7 mm case hardened cross links added boron, manganese and nickel for optimal durability and toughness at the same time.

SCAN TRAC

TRYGG Scan Trac is one of the lightest chains of its kind in the market. This chain, made exclusively of the best alloys maintains the good grip and enhances the remarkable TRYGG durability TRYGG Scan Trac comes complete with side chain tightening cams. TRYGG Scan Trac gives a remarkable comfort. Strength is built into every component. Light weight and durability make it a cost effective choice.

DETAILS

5x5 mm square chain with extra wear bars (flat stud) for safe and comfortable driving.

BOSS - 8 mm DOUBLE DUTY

Boss 8 mm double duty – the old heavy classic ladder chain with studs

TRYGG BOSS Double Duty studded chains come in chain thicknesses from 5 to 13 mm according to tire size and driver preference. The chain may be used for any normal equipment for all purposes. This chain is perfect to use on garbage trucks where weight on vehicle changes during the day. Please check local rules for chain usage.

The traction is second to no other tire chain!

DETAILS

Boss Double Duty has oversized round studs with a larger diameter than the link. The cross links with round studs are delivered in 8 and 9.5 mm adapted to the area of use and tire dimension. The chain is made of boron steel in the highest quality.

CHAINS USE REGULATIONS

PROVISIONS ABOUT THE USE OF TIRE CHAINS

If you drive a vehicle with a permissible total weight of over 3,500 kg, you must use chains when you are going drive on roads with snow and ice.

During the period when a pattern depth of 5 mm is required, chains must be included, regardless of the driving conditions. The chains must be adapted to the wheels of the vehicle and at all times provide contact between the chain and the road surface. They must be made of metal / steel, be suitable for driving conditions and withstand the stress.

Motor vehicle with a permissible total weight over 3,500 kg

must have at least three chains:

- 1 adapted front hole
- 2 adapted drive wheels

Trailer

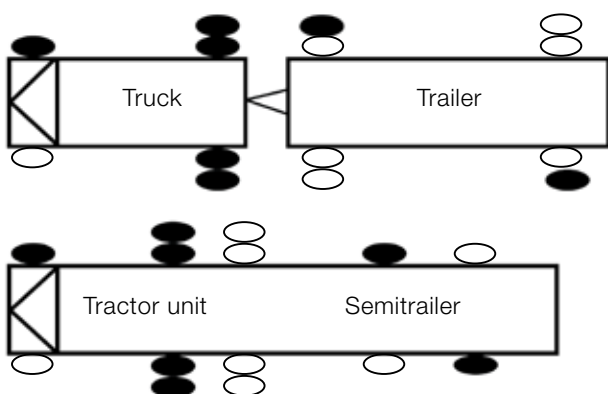

(motor vehicle and trailer when both the vehicles have a permissible total weight over 3,500 kg) must carry at least seven chains if the motor vehicle has twin wheels on the drive shaft.

- 1 adapted to the front wheel of the motor vehicle
- 4 adapted to the motor vehicle's drive wheels
- 2 adapted trailer wheels

If the motor vehicle in a train has single wheels on the drive shaft, or uses twin chains,

at least five chains must be brought.

- 1 adapted to the front wheel of the motor vehicle
- 2 adapted to the motor vehicle's drive wheels
- 2 adapted trailer wheels

Tire with chain = ●
Tire without chain = ○

Very many of our cargo and passenger car chains can be easily adapted to far more tire dimensions than they are originally made for.

Four of our most commonly used chain dimensions can be easily rebuilt to fit far more tires!

FAST TRAC

NEWS! The chain is adapted to the tire dimension. Easy installation!

FAST TRAC LIGHT CHAIN WITH SQUARE BARS - BESTSELLER!

TRYGG Fast Trac comes with 7x9 mm rectangular studs, which provide 30% larger grip-area! It is the professional choice for snow clearing. The chain "rolls" easily and meets the road as smooth as possible. It suits well tires with limited space under the fenders. With TRYGG Fast Trac you get the hardest, the thickest and the longest studs.

The chain may be tailored to a snug fit. On each side chain the assembly may be adjusted.

DETAILS

Lettkjettingen er utstyrt med 7x9 mm forlenget firkantpigg som gir suveren gripeevne.

SMT

BESTSELLER!

This is a traction chain for farming, light forestry, construction and snow clearing - excellent traction, smooth riding and virtually trouble free operation! All SMT-versions have oversized studs to increase grip and strength. Unlike the TRYGG SMT Flexi these chains are made to fit unique tire sizes and no extra adjustments should be necessary on new tires. Tightening rail is standard for 55 profile and lower and is available for all other tire dimensions as an option. A chain tightener is recommended for installation of heavy chains.

TRACTOR

DETAILS

TRYGG SMT has oversized studs, ie a larger diameter than the chain link. This gives longer life and better grip.

SAFETY GRIP

NEWS! The chain is adapted to the tire dimension. Easy installation!

SAFETY GRIP comes in 5 and 7 mm thickness. Safety Grip 7 mm is a versatile light weight chain suitable for all operations. The chain is particularly well appreciated in road service and yard work. This chain is light, which makes frequent mounting and dismounting easier. It is perfect for driving on changing road conditions.

Each item number of TRYGG Safety Grip is made to fit several tire dimensions. The user must normally cut the chain to get a proper fit.

DETAILS

Horizontal welded long and high wear bars (flat studs) that provide very good grip and durability. Side straps with twisted links minimize tire wear.

TRACTOR

SMT FLEXI

The SMT Flexi terrain chain is available in two dimensions: 8 and 9.5 mm. This is an allround tractor chain. The user may easily tailor the chain to a perfect fit without the need of any tools. The chain will fit perfectly on all brands as well as new and worn tires. Tight mesh pattern keeps many studs in contact with the ground at all times. Alloy steel deep case hardened for strength, durability and long service life.

DETAILS

SMT Flexi chain is equipped with oversized studs, hardened 10 mm hooks and 8 mm side chain.

8 mm

For more dimensions, visit our product selector on www.trygg.no

TRACTOR

Tractor chain is competitively priced. Its light weight is well appreciated when the chain is frequently mounted and dismounted. The primary area of use is domestic farm and yard work. The chain may be tailored to a snug fit. On each side chain the assembly may be adjusted. At the tail end of the chain an excessive section may easily be removed.

DETAILS

7 mm light chain with long 8 mm studs.

SMT

BESTSELLER!

TRYGG SMT is our most popular chain for heavy operations. It is aggressive all purpose chain for all types of off road conditions. The continuous pattern gives even traction and a smooth ride. The link interlocking keeps the studs straight up and creates a minimum of chain and tire wear.

Alloy steel, deep case hardened ensures durability and long service life.

DETAILS

TRYGG SMT has oversized studs, ie a larger diameter than the chain link. This gives longer life and better grip.

SMT EXCAVATOR

SMT EXCAVATOR is a special chain for excavators with too little space between the tires to use traditional dual triple chains. Developed in collaboration with leading operators. The floating pattern ensures continuous ground contact, and also provides comfortable ride. Produced in 8 and 9.5 mm thickness.

DETAILS

TRYGG SMT Excavator has oversized studs which gives longer life and better grip.

SM2D

SM2D gives an extreme grip and stability from massive amount of studs gripping the terrain at all times. Tight mesh coverage protects tires from wear and damage. The chain performs extremely well on steep icy terrain. Deep case hardened alloy steel ensures durability and long service life.

DETAILS

TRYGG SM2D has oversized studs which gives longer life and better grip.

GROUSER

GROUSER – perfect for heavy machinery and snow removal

TRYGG Grouser is the ultimate in snow-clearing traction and operating comfort. This durable chain is designed for use on paved roads and can handle anything from mountain passes to bike paths. The drop forged grousers are formed after the 9,5 mm links to prevent them from laying down. They are wide and rounded underneath to avoid tire-damage. Tightening rail is standard. Chain tightener is recommended during installation.

DETAILS

9.5 mm rings and forged plates provide very good grip.

SAFETY GRIP square link

This chain is made of square link cross chain. It is hardened twice in order to achieve the desired quality and extended service life. TRYGG Safety Grip can and should be used on both sides. Good driving comfort and service life are the strong features of this product. It is well suited for equipment with little space between the wheels and fenders. Tightening chain is standard. We recommend use of our chain tightener when mounting heavier chains!

DETAILS

The square chain is double hardened for extra resistance against violation. Can be delivered with flat studs.

SMALLER VEHICLES

- Car
- Pick-up
- SUV
- Van
- Camper
- ATV
- Forklift
- Small machines

Here you will find our specially developed chains for smaller vehicles such as ATVs, snow blowers, vans, pick-ups, forklifts and cars.

TRYGG ATV is full floating diamond patterned chain. Flexible and durable 5,5 mm twisted studded links provide good grip and exceptionally good traction. Studs are welded on every second link to prevent the chain from sliding on ice and rocks.

DETAILS

Studs only on every other link doubles the ground pressure per stud and thus radically increases grip and maneuverability.

FORKLIFT:

HELENE

TRYGG Helene is a premium chain for forklifts and skidsteers. Diamond pattern gives good maneuverability and good grip. Well suited for vehicles with limited space around the tires. Wear-bars are welded on all lying chain links. TRYGG Helene is more gentle on concrete and asphalt surfaces than a conventional studded chain. The continuous pattern allows precision driving.

DETAILS

Studs only on every other link doubles the ground pressure per stud and thus radically increases grip and maneuverability.

PICK-UP/CAR:

CLASSIC

An improved "work horse"!

Our standard studded chain for SUV, caravans and cars is available in 5 mm, 5,5 mm and 6 mm for extreme mud service and rig moves. The chain is now fully upgraded with the Super 2000 quality in studs, cross chain and side chain. Which means that the chain is stronger than ever before.

The chain comes in standard 4-link and 2-link spacing for single tires as well as our most popular "Dual triple" to cover both tires. Cam rails are optional.

Description	Price/pcs.	Item nr.
Pin connector tool, small	17.8	350005
Pin connector tool, large	24.9	350006

CHAIN BAGS

Description	Price/pcs.	Item nr.
S Chain bag	3.93	910040
M Chain bag	4.82	910050
L Chain bag	5.54	910060

SHORTENING

The chain must always be well adapted to the tire. When driving, it is important to have the chain snug and centered on the tire surface. The chain is accompanied by the manual "Installation, use and safety".

Flexi, Fast Trac, Safety Grip

The chain comes with a table of customization options. If the side chain should be adjusted, always do this first.

The length is adjusted with a cutting disc on the light chains.

Fast Trac, Swiss Flexi, SMT Flexi

The last section can be removed completely. On the last two sections the length can be adjusted.

The length of the side chain is regulated very easily and safely in several positions.

Repair parts

1.

2.

3.

4.

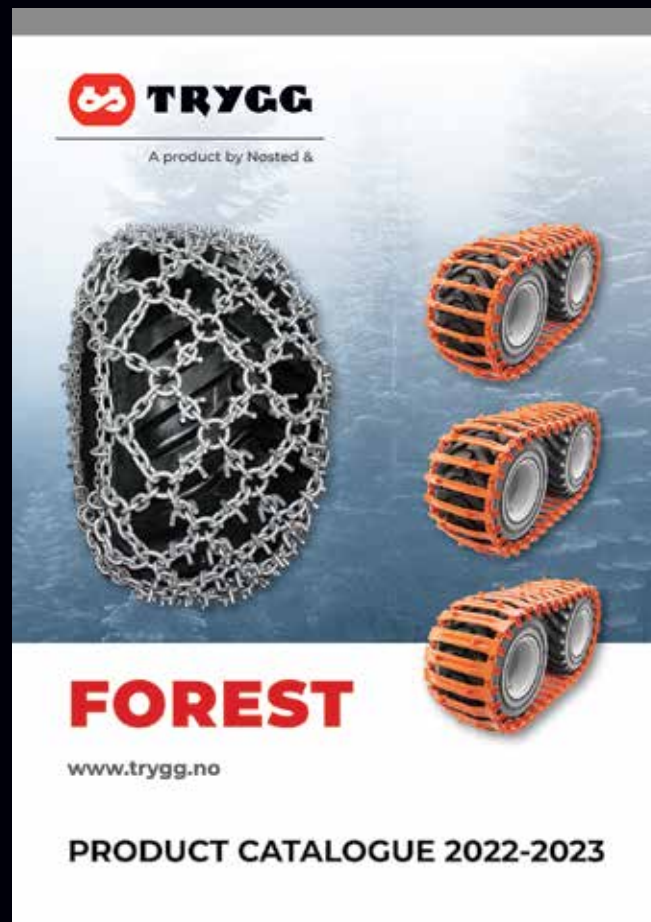

5.

1. Z-hook and S-hook are used to repair broken studded chains. Z-hook is used inside the chain and S-hook is used in ends.
2. Shackles are used for emergency repair of broken hooks, but wears faster than a regular hook. It is recommended to replace broken hooks with similar new ones as fast as possible.

3. Lap link for side chain. Do not use inside the chain pattern or as a replacement for broken hook.
4. Forged and hardened pin coupling and repair ring. These are our main components for lasting repair of breakage anywhere on the chain.
5. Tool for easy opening of small and large pin connections.

FOREST CHAINS AND TRACKS

We offer a wide range of chains and tracks to forestry machines.

For information about our forestry products visit our webpage or Forestry catalog.

You can also contact us directly by phone +370 699 38454.
